RE: Gordon Paving Company, Inc. (Burley) - #9501-014-2  
Tier II Operating Permit (#031-00001)

Dear Mr. Hansen:

On January 20, 1995, the Division of Environmental Quality (DEQ) received a Tier II operating permit application from Gordon Paving Company's Burley facility. On September 22, 1995, the application was declared complete. On December 21, 1995, a proposed Tier II operating permit was issued for public comment. No comments were received.

Based on review of your application and state and federal rules and regulations, DEQ finds this project meets the provisions of IDAPA 16.01.01.400. (Rules for the Control of Air Pollution in Idaho). Therefore, I am pleased to enclose your Tier II OP (#031-00001) for the emission sources that exist at the facility.

You, as well as any other entity, may have the right to appeal this final agency action pursuant to the Idaho Department of Health and Welfare Rules, Title 5, Chapter 3, "Rules Governing Contested Case Proceedings and Declaratory Rulings", by filing a petition with the Hearings Coordinator, Department of Health and Welfare, Administrative Procedures Section, 450 West State Street - 10th Floor, Boise, Idaho 83720-5450, within thirty-five (35) days of the date of this decision.

Please be advised that this operating permit is subject to permit application fees of five hundred dollars (\$500.00) in accordance with IDAPA 16.01.01.470. IDAPA 16.01.01.470 became effective on March 7, 1995. Information regarding the permit application fees will be sent to you shortly.

If you have any questions regarding the terms or conditions of the enclosed permit, please contact Brian R. Monson, Bureau Chief, Operating Permits Bureau, at (208) 373-0502.

Sincerely,

Orville D. Green  
Assistant Administrator  
Permits and Enforcement

## SOURCE

Gordon Paving Company, Inc. - General Description

## 1. SOURCE DESCRIPTION

1.1 Process Description

Gordon Paving Company, Inc., Burley, Idaho, is a batch-type, hot-mix asphalt plant. The maximum plant output is 170 tons per hour (T/hr). Sand and gravel is hauled into the Burley plant by trucks. Raw material is fed to feed bins by a front-end loader. Measured amounts of gravel are mixed together and fed into the rotary drum dryer. Waste oil is the primary fuel for the burner. Emissions from the dryer pass through a twin parallel cyclone, and then to a Venturi scrubber. Hot gravel mix is conveyed to the batching tower, screened, and dispensed into a weigh hopper. Liquid asphalt (AC10) is injected into a weigh tank, and then mixed with the hot gravel by a pug-mill mixer. Finished asphalt product is dropped into dump trucks below the pug-mill mixer.

1.2 Operating Equipment Description

- 1.2.1 Standard Steel Model RN 5000 batch, hot-mix asphalt plant, with a rated capacity of 170 tons per hour (T/hr)
- 1.2.2 Four (4) feed bins, each with a maximum capacity of 15 tons
- 1.2.3 Variable speed feed conveyor belts
- 1.2.4 A 7' x 28" rotary drum dryer
- 1.2.5 A Genco Model FP 69 burner (waste oil fired), with a rated capacity of 46.5 million British thermal units per hour (MMBtu/hr)
- 1.2.6 Three (3) deck 5' x 12' vibrating screens (totally enclosed)
- 1.2.7 Four (4) hot gravel storage bins
- 1.2.8 A pug-mill mixer
- 1.2.9 A Caterpillar Model 980 front-end loader

1.3 Control Equipment

- 1.3.1 Standard Steel twin parallel cyclone.
- 1.3.2 Venturi scrubber, with a pressure drop of five (5) inches of water and wet scrubber flow rate of 2,600 gallons per minute.

Gordon Paving Company, Inc.  
Tier II Operating Permit  
Burley, Idaho

031 - 00001

The Permittee is hereby allowed to operate the equipment described herein subject to the emission limits and monitoring and reporting requirements specified in this permit.

## SOURCE

Gordon Paving Company, Inc. - Emissions Limits

## 2. EMISSIONS LIMITS

2.1 Asphalt Plant Venturi Scrubber Stack Emissions Limits

Emissions of particulate matter (PM), particulate matter with an aerodynamic diameter of ten (10) microns or less (PM-10), sulfur dioxide (SO<sub>2</sub>), oxides of nitrogen (NO<sub>x</sub>), carbon monoxide (CO), and volatile organic compounds (VOC) from this stack, shall not exceed any corresponding emission rate limit, pounds per hour (lb/hr) and tons per year (T/yr), listed in Appendix A of this permit.

2.2 Stack and Vent Emissions Opacity Limits

Visible emissions from any stack, vent, or other functionally equivalent opening, shall not exhibit greater than twenty percent (20%) opacity for a period or periods aggregating more than three (3) minutes in any sixty (60) minute period, as required by IDAPA 16.01.01.625 (Rules for the Control of Air Pollution in Idaho). Opacity shall be determined using procedures contained in the Department's "Procedure's Manual for Air Pollution Control".

2.3 Visible Fugitive Emissions Limits at Facility Boundary

Visible fugitive emissions shall not be observed leaving the property boundaries exceeding a period or periods aggregating more than three (3) minutes in any sixty (60) minute period. This visual determination is to be conducted using Method 22, 40 CFR Part 60, Appendix A.

## 3. OPERATING REQUIREMENTS

3.1 Maximum Production Rate

The maximum production rate of this facility shall not exceed 170 tons per hour, and 352,240 tons per year (T/yr).

3.2 Hours of Operation

The maximum hours of operation of the facility shall not exceed eight (8) hours per day, and 2,072 hours per year.

3.3 Pressure Drop Across the Venturi Scrubber

Pressure drop across the Venturi Scrubber shall be maintained within manufacturer's specifications. Documentation of the manufacturer's specifications shall remain on-site at all times and shall be made available to Department representatives upon request.

3.4 Scrubbing Media Flow Rate

The scrubbing media flow rate to the venturi scrubber shall be maintained within the manufacturer's specifications. Documentation of the manufacturer's operating scrubbing media specifications shall remain on site at all times and shall be made available to Department representatives upon request.

3.5 Installation of Monitoring Equipment

The Permittee shall install, calibrate, maintain and operate, in accordance with manufacturer's specifications, equipment to continuously measure the pressure differential across the air pollution control equipment, and to measure the scrubbing media flow rate to the Venturi scrubber listed in Section 1.3 of this permit.

3.6 Control of Fugitive Emissions

Fugitive particulate emissions from the operation of the hot-mix asphalt plant, traffic on haul roads, traffic areas, and all aggregate handling equipment shall be efficiently and reasonably controlled as required in IDAPA 16.01.01.808 and IDAPA 16.01.01.650.

## SOURCE

Gordon Paving Company, Inc. - Operating Requirements

Some of the efficient and reasonable controls may include, but shall not be limited to the following:

- 3.6.1 Use of water or environmentally safe chemicals;
- 3.6.2 Application of dust suppressants;
- 3.6.3 Use of control equipment;
- 3.6.4 Covering of trucks;
- 3.6.5 Paving roads; and
- 3.6.6 Prompt removal of earth or other stored material from streets, where practical.

### 3.7 Air Stagnation Advisory Days

There shall be no operation of the hot-mix asphalt plant during days of Air Stagnation Advisory resulting in mandatory burning bans, or during periods of high winds.

### 3.8 Burner Fuel

Sulfur content of the waste oil shall not exceed 1.75%, by weight, as required in IDAPA 16.01.01.727.02 (Rules for the Control of Air Pollution in Idaho).

## 4. MONITORING REQUIREMENT

4.1 Operating Parameters

The following parameters shall be monitored on both a daily and annual basis. All data shall be kept on-site in a log for a period of two (2) years and made available to Department representatives upon request.

4.1.1 Hot-mix asphalt production;

4.1.2 Hours of operation of the hot-mix asphalt facility.

4.2 Air Pollution Control Equipment

The following parameters shall be monitored on a daily basis. All data shall be kept on-site in a log for a period of two (2) years and made available to Department representatives immediately upon request.

4.2.1 Pressure drop across the Venturi Scrubber;

4.2.2 Scrubbing media flow rate to the Venturi Scrubber.

4.3 Performance Test

Within sixty (60) days after the issue date of this permit, the Permittee shall conduct a performance test to measure particulate matter (PM) emissions from the hot-mix asphalt plant exhaust stack in accordance with 40 CFR 60.8, and in accordance with General Provision I of this permit. Visible emissions from the hot-mix asphalt plant exhaust stack shall be observed during this test using the methods specified in the Department's "Procedure's Manual for Air Pollution Control."

The test shall be performed while the asphalt plant is operating at maximum capacity, and the following shall be measured and recorded during the performance test:

4.3.1 Tons per hour (T/hr) of hot-mix asphalt paving material produced;

4.3.2 Pressure drop across the Venturi scrubber;

4.3.3 Scrubbing media flow rate to the Venturi scrubber;

4.3.4 Type of fuel and burner fuel flow rate (i.e., gallons per hour); and

4.3.5 Sulfur content of fuel (i.e., percent by weight).

## SOURCE

Gordon Paving Company, Inc. - Monitoring Requirements

4.4 Fugitive Control Monitoring

The Permittee shall monitor and record in a log, during operation, on a daily basis, the method(s) used to reasonably control emissions from all sources listed in Section 3.6 of this permit. The log shall also include the type of control used (i.e., water, environmentally safe chemical dust suppressants, etc.), as well as the circumstances under which no controls are utilized. The most recent two (2) years' compilation of data shall be kept on-site and be made available to Department representatives upon request.

4.5 Fuel Monitoring

The following parameters shall be monitored and recorded in a daily log to be kept on-site for a period of two (2) years and made available to Department representatives upon request.

4.5.1 The type and amount of fuel used by the burner; and

4.5.2 The sulfur content of the waste oil by a certified sulfur content analysis from the supplier for each delivery of waste oil to the facility.

## AIR POLLUTION OPERATING PERMIT

## PERMIT NUMBER

## PERMITTEE AND LOCATION

031 - 00001

Gordon Paving Company, Inc.  
 Tier II Operating Permit  
 Burley, Idaho

The Permittee is hereby allowed to operate the equipment described herein subject to the emission limits and monitoring and reporting requirements specified in this permit.

## SOURCE

Gordon Paving Company, Inc. - Reporting and Recordkeeping Requirements

## 5. REPORTING AND RECORDKEEPING REQUIREMENTS

5.1 Performance Test Protocol

The Permittee shall submit a protocol for the performance test required in Section 4.3 of this permit, to the Department, for approval at a minimum of thirty (30) days prior to the test date.

5.2 Performance Test Report

The Permittee shall submit a written report of the hot-mix asphalt plant performance test to the Department within thirty (30) days after performing the test. The information required to be recorded during the performance test shall also be submitted as part of the report.

5.3 Certification of Documents

All documents, including, but not limited to, records, monitoring data, supporting information, testing reports or compliance certifications submitted to the Department shall contain a certification by a responsible official in accordance with IDAPA 16.01.01.123. The certification shall state that, based on information and belief formed after reasonable inquiry, the statements and information in the document are true, accurate and complete.

- a. As determined by a pollutant specific U.S. EPA reference method, Department approved alternative, or as determined by the Department's emission estimation methods used in the permit application analysis.

ISSUED: February 28, 1996  
EXPIRES: February 28, 2001

OPERATING PERMIT GENERAL PROVISIONS

- A. All emissions authorized herein shall be consistent with the terms and conditions of this permit. The emission of any pollutant in excess of the limitations specified herein, or noncompliance with any other condition or limitation contained in this permit, shall constitute a violation of this permit and the Rules for the Control of Air Pollution in Idaho, and the Environmental Protection and Health Act, Idaho Code 39-101 et. seq.
- B. The Permittee shall at all times (except as provided in the Rules for the Control of Air Pollution in Idaho) maintain in good working order and operate as efficiently as practicable, all treatment or control facilities or systems installed or used to achieve compliance with the terms and conditions of this permit and other applicable laws for the control of air pollution.
- C. The Permittee shall allow the Director, and/or his authorized representative(s), upon the presentation of credentials:
- 1) To enter upon the Permittee's premises where an emission source is located, or in which any records are required to be kept under the terms and conditions of this permit; and
  - 2) At reasonable times to have access to and copy any records required to be kept under the terms and conditions of this permit, to inspect any monitoring methods required in this permit, and to require stack emission testing (i.e., performance tests) in conformance with state approved or accepted EPA procedures when deemed appropriate by the Director.
- D. Except for data determined to be confidential under Section 39-111, Idaho Code, all reports prepared in accordance with the terms of this permit shall be available for public inspection at the appropriate regional office of the Division of Environmental Quality.
- E. Nothing in this permit is intended to relieve or exempt the Permittee from compliance with any applicable federal, state, or local law or regulation, except as specifically provided herein.
- F. In the event of any change in control or ownership of source(s) from which the authorized emissions emanate, the Permittee shall notify the succeeding owner or controller of the existence of this permit by letter, a copy of which shall be forwarded to the Director.
- G. This permit shall be renewable on the expiration date, provided the Permittee submits any and all information necessary for the Director to determine the amount and type of air pollutants emitted from the equipment for which this permit is granted. Failure to submit such information within sixty (60) days after receipt of the Director's request shall cause the permit to be voided.
- H. The Director may require the Permittee to develop a list of Operation and Maintenance Procedures which must be approved by the Department. Such list of procedures shall become a part of this permit by reference, and the Permittee shall adhere to all of the operation and maintenance procedures contained therein.
- I. The Permittee shall provide the Department a minimum of thirty (30) days notice prior to the scheduled date of any performance test required pursuant to this permit. Such testing must strictly adhere to the procedures outlined in the Department's Procedure's Manual for Air Pollution Control, and will not be conducted on weekends or state holidays, unless the Permittee obtains prior Department approval. Testing procedures and specific time limitations may be modified by the Department by prior negotiation if conditions warrant adjustment.

ISSUED: February 28, 1996  
EXPIRES: February 28, 2001

The Permittee shall promptly notify the Department of any change in the testing schedule and shall provide at least five (5) working days notice prior to conducting any rescheduled test, unless the Department approves a shorter advanced notice period. Any records or data generated as a result of such performance tests shall be made available to the Department upon request.

The performance tests will be performed at the maximum production rate unless otherwise is specifically stated elsewhere in this Operating Permit. If this maximum rate is not achieved during testing, the allowable production rate will be limited to the production rate attained during testing.

- J. The provisions of this permit are severable; and if any provision of this permit to any circumstance is held invalid, the application of such provision to other circumstances, and the remainder of this permit shall not be affected thereby.
